AUSBIOTECH 2010 NATIONAL CONFERENCE SPEAKERS' PROFILE

Dr Jason Chaffey
Chief Technology Officer
bluechiip Pty Ltd

Jason is the Chief Technology Officer for bluechiip - a company developing a new micro-electromechanical based RFID device for high value and environmentally robust tracking for cryogenic applications.

Dr Chaffey is primarily responsible for the technical development of the bluechiip technology and overseeing the commercialization of this technology. Dr Chaffey has been actively involved in MEMS technology for a decade with extensive experience in government and university research laboratories in the area of technology transfer, design, implementation and commercialization of microtechnology devices. He has a number of patents in the area of microtechnology, and these are currently being pursued for commercial purposes. Prior to his joining bluechiip, Jason was involved in a number of key technology laboratories including the Microengineering section of the Scientific Engineering Services and the Advance Sensors Lab at DSTO, and the Advanced Engineering Centre for Manufacture at RMIT.

Dr Chaffey received his Bachelors in Advanced Science at the University of New South Wales (Sydney) and his PhD from RMIT University (Melbourne). He is a member of the Institute of Physics and is the Chair of the Australian Delegation for the Micromachine Summit.
