AUSBIOTECH 2010 NATIONAL CONFERENCE SPEAKERS' PROFILE

Dr Scott Martin
Leader, Biomedical Manufacturing Research Theme
CSIRO

Scott leads the CSIRO's Biomedical Manufacturing Research Theme. The research theme is a diverse team of researchers and engineers collaborating in the development of biomedical technologies such as pro-drug delivery platforms, high performance medical imaging contrast agents, in-vitro diagnostics, medical implants and catheters.

Scott's own research experience includes in-vitro diagnostics based on ion channel switches and surface plasmon resonance, but has also worked more broadly in research for lithographic offset printing, aerospace, counter-terrorism and manufacturing. Other interests include the promotion of physics and the promotion of the medical device manufacturing community via roles with the Australian Institute of Physics and AusMedtech.
